

Net Solutions started in January 2005. At that time, we created two companies, one focused on selling transport via the internet: Ya Transporte, and one company focused on warehousing, mainly warehousing of spare parts: 24 HRS Logistics.

Currently Net Solutions XXI is the brand name that incorporates both companies.

When we started with 24 hrs Logistics, we started with several spare parts clients: Akibia, Quantum and Adic, in warehouses in Madrid, Barcelona, Bilbao and Seville. This start was due to the trust that was placed upon us by a Dutch logistics company that manages over 130 warehouses in Europe. The agreement with this company is what really triggered of 24 Hrs Logistics, which made us gain the critical mass that is always so important in the logistics world.

More clients entered, but the agreement with Ricoh in 2006 was an important milestone. From Barcelona we pick and pack for Ricoh all spare parts to Spain and Portugal. This is an operation with more than 1.200 picking lines a day (more than 400 orders).

Other milestones and important data:

- In 2007: opening of our own warehouse in Madrid (Coslada).
- In 2008: opening of our own warehouse in Barcelona (Hospitalet de Llobregat)
- In 2007 HP entered with 4 warehouses.
- In 2006 El Mundo and Prosegur start.
- In 2007 Leben entered as an important client in the Marketing (loyalty programs).
- In 2008 Wincor Nixdorf started with 12 warehouses in Spain.
